

## Scenario:

You are a student at University of South Carolina. You find yourself constantly forgetting an umbrella on certain days and never know when the weather will update hourly. You also want to know what the weather is like in your hometown due to the road trip you planned yesterday.

Task 1: Check the weather on the home screen of the app.

Task 2: Go to settings for notifications and change the weatherly update to hourly.

Task 3: Use the search bar to find your hometown and check its weather for a clear day.

## Notes

What changes should make to your application

1. A functional search bar with keyboard
2. Design and color
3. Make alerts easier to access

What you need to keep the same for the application

1. The settings
2. Layout of the home screen
3. The time included in the app
